SLEISHMAN TWIN PEDAL
Innovation Since 1971 Original Inventors of the Twin Pedal

STP-Sleishman
Twin Pedal w/Case
Retail USD
\$799.00

Left and right pedals have exactly the same action, no unnecessary universal joints or extension arms are used.

Beater cams are designed for minimum resistance and maximum throw. Low rollovers, short strokes through to heavy, driving strokes. Engineered to suit all playing styles.

Due to the twin pedals unique angular design all precision made parts work in unison producing complete efficiency of movement.

Both beaters are driven directly by their footplates. The result, a completely balanced feel.
