

# GLOVE SIZING CHART

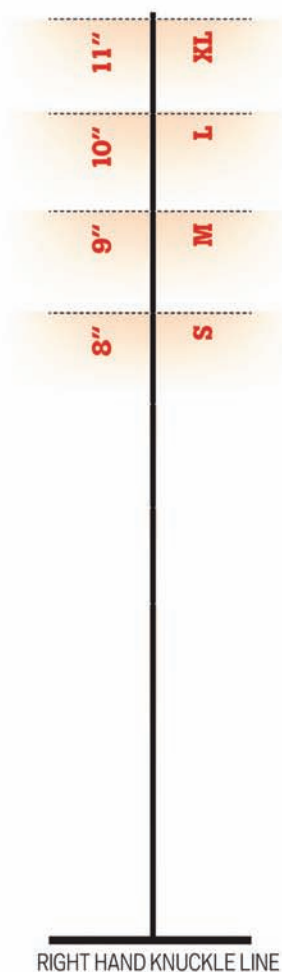

## TO USE A TAPE MEASURE:

Place the tape measure around your knuckles, or the widest part of your hand, making a loose fit. Round your measurements to the nearest inch.

<b>8" (20cm)</b>	<b>SMALL</b>
<b>9" (23cm)</b>	<b>MEDIUM</b>
<b>10" (25cm)</b>	<b>LARGE</b>
<b>11" (28cm)</b>	<b>X LARGE</b>

Place your right hand with the knuckle of your index finger against the black knuckle line at the bottom of the chart.

No two hands are the same. No method can be as accurate as trying on our gloves. Use one of the two methods above to find your approximate glove size. This is a general guide only.
