

Thank you for your Logjam purchase. Here are a few pointers to get you started

- 1) Your stomper will sound best through a good quality amp/PA and speakers.
- 2) The Logjam Rattlebox is designed to be played hand-held with the fingers or with the feet or with multi-rods /brushes.
- 3) You can adjust the screws on the stomping surface for different tone.
- 4) Use a standard guitar cable to connect to your amp & turn down volume *before* connecting. Then experiment with your tone controls. To obtain more snare rattle increase the hi or treble. Dial out the bass and add some middle . For a deep "thud" take out the mid and treble eq and max the bass.
- 5) This Logjam product is coated in Linseed oil and so you can easily apply more of the same to the percussion surface once it gets to look a bit worn.
- 6) Check out our videos on the website product page also.

Logjam products are guaranteed for 1 year from date of purchase but please register at the URL below, to see our other products, to get your free extended 3 year warranty and to become a part of the Logging Community.
