DRUM THRONES

Patented

AHEAD Spinal-G Drum Thrones & Standard Drum Thrones

Ergokinetics™ Spinal-Glide™ seat designed to improve flexibility and fights fatigue, hip, back and shoulder pain because it:

- Allows the pelvis to move reciprocally in three dimensions.
- Allows the tailbone (coccyx) to hang naturally versus being compressed against a seat.
- Supports a more natural movement of the spine and shoulders while seated.

(Holds up to 3 Toms 10,12,14, Includes AA3000 & AA3001).

Patented "TruForm" design corresponds to the "true shape" of the drum plus its mounting hardware. This universal teardrop design allows a much snugger fit.

Patented "DynaZip" Zipping system makes it easier to take the drums in and out of the cases - combining an ingenious cutaway design with a zipper that travels along the diameter of the case as well as down both sides of the cutout.

DX-Core provides the stiffness of three layers of high-impact foam padding, the softness of premium-grade Sherpa Fleece lining. Plus water-proof 600 denier-polyester fabric exterior.

Snare Drum Cases

HYBRID Hard Case

TRU FORM
ENGINEERED

Patented "TruForm" design corresponds to the "true shape" of the drum plus its mounting hardware. This universal teardrop design allows a much snugger fit.

PDX CORE

PDX-Core provides the stiffness of a Hard Case with two layers of high-impact foam padding, the softness of a premium-grade Sherpa Fleece lining. Plus, a .210" thick ABS Inner Hard-Core. Water-Resistant 600 Denier polyester fabric exterior.

I.D. Holder

Includes Shoulder Strap

KASZA

CYMBALS

HANDMADE QUALITY TRADITION

R-SERIES "ROCK"

R-series cymbals are designed for a wide of range of popular music styles. Completely hand hammering preserving the ancient tradition in handmade cymbals. Made from pure B20 cast bronze (80% copper, 20% tin.) All of our cymbals are hand picked for sound quality and workmanship to satisfy the highest demands. Every KASZA cymbal is a unique instrument and a true piece of art. No two are alike.

F_{SERIES} "FUSION"

F-series cymbals are designed for more complex styles of music like jazz fusion. They are thinner with a soft lathe cut, smaller bell giving a dryer, darker sound, with a fast decay. Made from pure B20 cast bronze (80% copper, 20% tin.) All of our cymbals are hand picked for sound quality and workmanship to satisfy the highest demands. Every KASZA cymbal is a unique instrument and a true piece of art. No two are alike.

KASZA CYMBAL WARRANTY

Most KASZA Cymbals have a 1 Year Limited Warranty against manufacturer's defects from the original purchase. Special effects cymbals with numerous holes like the OFX, Smash FX and the TrapClap only have a 30-day limited warranty. If there is a warranty claim, the customer must e-mail a single photo of the cymbal showing the damage, a photo of their cymbal set-up on their drum set, and a copy of the purchase receipt to mail@bigbangdist.com to acquire a return authorization.

"Smooth" Prolog

Logjam

Bass Drum in a Box

Prolog- MAMBA

Travelog 2

Logarhythm 4

Prolog

Microlog 2

Rattlebox

Travelog 2

Travelog is our baby stomper. It will fit neatly into the central pocket of a hard guitar case. It is very handy for almost any type of musician (i.e. Cajon, Keyboard, Guitar players, etc.) Because it is compact, it has only one tone, as the width does not allow for tonal variation like the Logarhythm. It is nevertheless very effective. The dynamic mic capsule is high quality and the output socket is a standard 1/4" mono jack as with all our other models.

Logarhythm 4

Our mk3 Log is a 3rd generation in it's series. Made from solid Sapele it weighs in at around 575 grams which is 175 grams heavier than the Travelog. The main advantage of the mk3 is the fact that it's width enables tonal variation. You can get a softer more subtle sound on the left hand side of the radius and a harder, heavier sound on the right-hand side. The width also enables the player to use both feet on the unit simultaneously.

Prolog, Prolog Black Mamba, Prolog Smooth

Prolog is our top of the range unit that features an integral "groove board", and an ultra low stomping angle. The acoustic chamber is formed in the base as well as in the "head" allowing for a stomping height of no more than 2 cm. The design allows for the capsule to be angled up to the contact point and the integral board means that the unit is securely anchored by the player's heel.

Microlog 2

Microlog is designed to fit neatly into a pedal-board and can be used alternatively as a stand-alone unit. Pocket-sized it may be but it doesn't have a pocket-sized sound as it's built to precisely the same quality as all our instruments. At a mere 245 grams and featuring similar dimensions to a standard size overdrive or chorus pedal it won't weigh you down.

Rattlebox

The Rattlebox is a very versatile instrument. It can be used as a snare drum with appropriate eq or used more like a kick drum or low tom when the mids and highs are rolled off and the bass is boosted. It can be played with the hands, with the feet, or with multi-rods and brushes. When played with the hands it is possible to get sounds akin to that of bongos or alternatively, low cajon. The Rattlebox includes a full length drum snare underneath the lid which is responsible for its unique analog sound.

Dunnett

- Remo Quality
- Uncoated Tympani Film
- Expanded Tension Latitude
- Unique Semi-Transparent Finish

- Smart Shipping
- Clear Bag, No Box
- Russian Doll Stacked
- 5% Freight Allowance

Dunnett R Class™ Reso-O-Tone™ drum heads represent a subtle but completely new approach to the traditional drum head. While working with Remo™ to develop the new Felt Tone™ bass drum heads, Ronn Dunnett devised a simple, unique and original head design using Remo films. Dunnett's™ are made from a previously unavailable film combination that produce an unmatched resonance, have a broader tensioning latitude and have fresh sonic and kinetic characteristics. "Tympanic" is how Dunnett describes them.

TOPPERS are mallet heads that fit securely onto the tip of any medium drum set stick. They're based on a traditional Austrian timpani mallet design of tightly stacked layers of cloth. The result is a drum set mallet that sounds and feels far superior than a felt covered timpani stick and is way more durable. The hard leather, medium canvas and soft flannel bring a brand new palette of timbres to your drums and cymbals.

MIC

HOLDERS™

DRUM MIC MOUNTING SYSTEM

Patented

Mic Holders eliminate the need for any mic stands or bulky claw attachments to mic your kit. They are compact and can be left permanently attached to your hardware. This also means less need for floor space and less clutter around your kit.

- Shock Mounted
- Compact Storage
- Easy Setup/Breakdown
- Streamline Appearance
- Less Floor Space Needed
- Fits in Most Cases
